

Education Scholar: Module 4c - Learning in the Experiential Setting

Module Authors

Cecilia M. Plaza, Pharm.D., Ph.D., Director of Academic Affairs and Assessment American Association of Colleges of Pharmacy (AACP).

Beverly A. Talluto, Pharm.D., M.HSc., Associate Professor and Assistant Dean of Experiential Education at Virginia Commonwealth University School of Pharmacy, Richmond, Virginia. Coauthor of *Module 4C, Learning in the Experiential Setting*.

Introduction

This module focuses on the preceptor as an educator, and will help you develop skills to improve your teaching in the experiential setting to maximize learning. In the course of completing the module, you will also become familiar with an instructional design process you can use to develop learning activities for the experiential education setting.

Purpose and Objectives

By the end of this module you will be able to:

- Define the attributes and characteristics of a preceptor.
- Develop educational objectives for your experiential rotation site.
- Describe the different types of tools used in instructional development in experiential education.
- Select and organize appropriate learning experiences for learners in the clinical setting.
- Assess the effectiveness of clinical learning experiences.
- Discuss the role of communication in experiential education and how to successfully incorporate it into clinical learning experiences.

Module Materials

There are no required textbooks for this course. Recommendations for further reading are introduced in each topic.
