Choosing to pursue a career in dentistry is an investment in your future, both financially and professionally. A dental education is expensive, but it’s likely your income will help you repay your loans in a timely fashion. Dentists are in the top 5% of the nation’s wage earners. According to the 2007 ADA Survey of Dental Practice, the average salary earned by new dentists (dentists practicing 10 years or less) was between $182,960 and $226,390 depending upon what kind of practice and schedule they chose.

Nonetheless, yearly tuition averages between $25,322 and $40,737 depending upon residency requirements according to the ADA Survey of Dental Education (2007–08). The good news is there is money available to support your pursuit of a dental education, in the form of loans, scholarships, grants, and service commitment programs. There are also tax credits and tax deductions available during and after dental school for educational expenses.

The majority of dental students take out loans to finance their education. According to the 2008 ADEA Survey of Dental School Seniors, 93% used one or more loans to finance their dental education. Taking out student loans is a serious financial commitment. Educating yourself about the financial aid process and keeping up to date on changes in federal loan programs will help you make wise decisions.

Regardless of how much money you or your family have right now, it is possible to afford a dental education through financial aid and smart money management skills. This chapter provides information on financing and repayment options, applying for financial aid, and other resources to help guide you through the financial aid process.

WHERE DO YOU BEGIN?

The financial aid office (FAO) of the institutions you are interested in attending is the best place to begin. These offices can provide you with information on institutional loans and scholarships, alternative loan resources, and about how most students at their institution finance their education. Before contacting the FAO, you may want to check the institutions’ websites for the most current information on costs and state residency requirements that may affect costs. Part II of this guide also provides information on each dental school’s costs and financial aid process.

Below is a list of useful questions to ask the FAO.

- Does the institution itself offer any grants, scholarships, or loans? (Be sure to ask about merit and need-based scholarships.)
- How does your institution determine a student’s eligibility for school funds?
- What does the cost of attendance include?
- What is the range of cost-of-living expenses?
- Is parental income taken into consideration when determining eligibility for school funds?
Determining How Much Money You Will Need

Determining what your dental education will cost and how much you will need is the first step of the financial aid process. It is important to carefully evaluate your current financial situation to ensure that you borrow the minimum amount needed. You do not want more debt than you can manage after graduation.

Evaluate Your Financial Status

- Understand your current debts. Include car loans, credit card payments, existing student loan debt, and any other outstanding loans you may have. Be aware that your student loans may accrue interest while you are in school.

Evaluate Your Financial Resources

- Determine if you will have income from employment, a spouse, or investments.

According to the 2008 ADEA Survey of Dental School Seniors, 93% used one or more loans to finance their dental education.

STUDENT PROFILE

DANIELLE CAUSEY
SECOND-YEAR DENTAL STUDENT
LOUISIANA STATE UNIVERSITY SCHOOL OF DENTISTRY
HOMETOWN: LAFAYETTE, LOUISIANA

Why did you choose dentistry?
My path was a little different. My undergraduate degree was in English, and I had no interest in dentistry or even knew what the field was about. Once I was out in the real world, I knew I needed a different career and something more satisfying. At the time I was writing literary criticism for a university. I found dentistry had exactly what I wanted in a career, and it fit my personality. I would be able to work with my hands and interact with people. I wanted to help people and make a significant impact on people’s lives. I had to take four semesters of nothing but science to catch up on my prerequisites. I dove straight in.

What are you doing right now?
I’m a second-year student and just started classes. I can’t wait to start clinical rotations in November and get my first patients. I’m also serving on the ADEA Council of Students, Residents, and Fellows.

What are your short-term and long-term goals?
I’ve been toying with the idea of pursuing dental education. I think I would be a good educator. It would also be a nice way to reconfirm everything I’ve learned. Long-term, I’m thinking of starting a practice in 10-15 years.

Advice to applicants and first-year students.
The best thing I did when I first decided I was going to apply to dental school was to call the school I was interested in attending and speak to the admissions department. I started asking questions. They told me what extracurricular and prerequisite classes to take, and I followed their advice. The first year is full of ups and downs and questioning of your abilities. It's so hard and so difficult that you just have to remember that the school chose you for a reason. That would help me get through some of the most difficult times. Time management and prioritizing also helps.

What do you view as the most interesting issue in dentistry?
As a dentist we are going to see our patients a lot more frequently than medical doctors. At least twice a year. Being able to spot certain diseases and conditions and referring patients to a physician will play an important role in their health care.

What do you do for balance in your life?
There are sixty-two people in our class, and we know each other very well. At least once a week we get together for some kind of organized social event. We really support and help each other out a lot.

What is the last good book you read?
Complications: A Surgeon Notes on an Imperfect Science by Atul Gawande. A lot of it is related to seeing first patients.

Are you married/partnered/single? Any children?
Married.
Account for any family gifts or other resources you will be able to use. These can include savings, scholarships or grants you may have already been awarded, and tuition waivers.

Create a Budget
- It’s important to create a budget to get a sense of how much money you will need for yearly living expenses. Some expenses may be covered by financial aid. See Table 4-1 for a sample student budget.
- Federally funded financial aid is not intended for credit card payments, alimony, household goods and furnishings, student loan repayments, interview expenses, or support of a spouse or dependents.
- Attendance-related expenses eligible to be covered by financial aid include tuition, books, fees, room and board, transportation, miscellaneous personal expenses, and child care.
- Add 5% to each year to project a four-year budget.

Determine Your Eligibility for Financial Aid
Almost all dental students who are U.S. citizens can qualify for some form of financial aid. (Financing options for international students are covered later in the chapter.) The amount you qualify for will depend upon your financial resources right now as you learned about in the previous section. Determining your eligibility for financial aid can help you decide what amount of money you will need to borrow in student loans.

The FAO will determine your financial need once you have submitted your application. It is calculated by subtracting your expected financial contribution from the cost of attendance. The difference is considered your unmet need, which can be fulfilled through federal and private loans. A financial aid officer can also exercise his or her professional judgment when calculating your need by examining other financial commitments that may affect your ability to pay for dental school.

There are special considerations in determining eligibility.

Dependency: Dependency for financial aid purposes is not the same as dependency for tax purposes. However, for some federal aid, your parents’ financial information may be required.

Home Equity: If you own a home, equity is another factor that is sometimes taken into consideration. For some federal loan programs home equity is not considered in the calculation, however, when the FAO evaluates your eligibility for institutional scholarships or loans, it may be considered as an asset.

Table 4-1. Example of a 12-Month Student’s Budget Worksheet

<table>
<thead>
<tr>
<th>Monthly</th>
<th>12-Month Total*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mortgage or rent</td>
<td>$650 $7,800</td>
</tr>
<tr>
<td>Utilities: electric, gas, sewer, phone</td>
<td>$100 $1,200</td>

<tr>
<td>Food: groceries, dining out</td>
<td>$400 $4,500</td>
</tr>
<tr>
<td>Personal (laundry, clothing, etc.)</td>
<td>$100 $1,200</td>
</tr>
<tr>
<td>Transportation (car payment, maintenance, gas, repair, parking, insurance)</td>
<td>$300 $3,600</td>
</tr>
<tr>
<td>Homeowners/renters insurance</td>
<td>$25 $300</td>
</tr>
<tr>
<td>Life insurance (may include dependents)</td>
<td>$25-$50 $300-$600</td>
</tr>
</tbody>
</table>

Examples of expenses that are not allowable in a student budget include credit card payments, alimony, household goods and furnishings, interview expenses (suits, travel, etc.), and student loan payments.

Types of Financial Aid
Financial aid for dental school is available through a variety of loans and scholarships from public and private resources. As mentioned before, the majority of students receive financial aid in the form of loans. The following section discusses the types of loan programs and scholarship options that exist. Due to changes in legislation, the terms of and guidelines for federal loan and scholarship programs are also subject to change. It is a good idea to double-check all terms, conditions, and requirements before accepting or applying for any specific loan or scholarship. Table 4-2 displays an overview of the types of financial aid available to students.

Loans
Loans are funds that need to be repaid by the borrower. Dental students often take advantage of loans offered by the federal government first, supplementing with loans from...
**TABLE 4-2. TYPES OF FINANCIAL AID**

<table>
<thead>
<tr>
<th>Loans:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>The primary source of financial aid for dental students. Must be repaid by the recipient.</td>
<td></td>
</tr>
</tbody>
</table>

**Gift Aid (scholarships and grants):**
- Merit-based or need-based aid. Does not have to be repaid by the recipient.

**Research Fellowships or Traineeships:**
- Stipends or scholarships to students who conduct scientific research.

**Service Commitment Scholarships:**
- Support for educational and living expenses while a student is in school; in exchange, recipients are required to serve in the military or in health care shortage areas after graduation.

**Loan Repayment Programs:**
- Available after education is completed. A borrower who works in a health care shortage area providing care to underserved populations may be eligible for a federal or state loan repayment program. Examples include the Indian Health Service (IHS), National Health Service Corps (NHSC), and various state loan repayment programs. The U.S. Armed Forces and the National Institutes of Health (NIH) also offer programs in exchange for service or employment.

**Education Tax Breaks:**
- Student loan interest deduction, Lifetime Learning Credit, tuition and fees deduction, and Education IRAs.

**Work-Study:**
- Provides students an opportunity to work part time. Because the dental school curriculum is demanding, dental students are often not able to take advantage of this opportunity.

Professional Judgment

The financial aid officer has the authority to exercise his or her professional judgment when evaluating your financial aid application, taking into consideration factors that may affect your ability to contribute to a dental education. For example, unusual medical or dental expenses, a recent job loss or reduction of wages, or costs associated with a disability could be considered. Professional judgment allows the financial aid officer to adjust the cost of attendance to better reflect your financial circumstances. It is important to meet with your financial aid officer to discuss your financial situation if you have these kinds of expenses. Keep in mind you must have valid reasons and proper documentation to support adjustments to the need analysis.

Private lenders to cover any remaining unmet need. Interest rates on student loans are usually lower than most other types of consumer credit. They typically come with additional benefits, such as deferment of payment while enrolled as a student and a grace period following graduation and (in some cases) postdoctoral education. There are also loan programs through private lenders to help you finance dental school if you have remaining need after federal loans have been awarded.

*Under the Federal Family Education Loan Program (FFEL) and the Federal Direct Student Loan Program (FDSLIP), federal loans are available to dental students. Loans under the FFEL are authorized by the federal government through a bank, and loans from the FDSLIP are made by the federal government through the institution. Your institution will let you know which program it participates in, but be sure to talk with the FAO about the current terms for each program.*

*At the time of this edition’s printing, Congress was considering legislation that would change the way federal loans are disbursed to students. To find out more, please check the Current and Future Students section of the ADEA website at www.adea.org.*

**Federal Stafford Loan Program**

There are two types of federal Stafford loans: subsidized and unsubsidized. You can receive a total annual amount of $40,500. The cumulative borrowing limit for both is $224,000.

For subsidized Stafford loans, the federal government pays the interest while you are in dental school, and the amount awarded is based upon your financial need. Unsubsidized Stafford loans accrue interest during your education, and the amount awarded is not contingent on your financial need.

The maximum annual Stafford Loan amount is $40,500. Depending on your eligibility and financial need, you may receive up to $8,500 of that amount in subsidized Stafford Loans. The total amount of subsidized Stafford loans you can receive throughout your education (from undergraduate through postdoctoral) is $65,500. If you need additional funds below the cumulative borrowing limit, you may be able to receive them as unsubsidized Stafford loans.

The interest rate for Stafford Loans (subsidized and unsubsidized) disbursed on or after July 1, 2006, is fixed for the life of the loan at 6.8%.

**Federal Perkins Loan Program:** The Federal Perkins Loan Program provides long-term, low-interest loans to students with exceptional financial need. There is a 5% interest rate, and the annual amount available is $8,000, with a cumulative borrowing limit of $60,000. Awards are made through your institution.

**Health Professions Student Loan Program:** The Health Professions Student Loan Program (HPSL) is also for students with exceptional financial need and offers loans at a 5% interest rate. Funds are administered through your institution.
Loans for Disadvantaged Students: Loans for Disadvantaged Students (LDS) are available from the federal government at a 5% interest rate. This program is not available at all institutions.

The U.S. Department of Health and Human Services defines a student from a disadvantaged background as an individual who comes from an environment that has inhibited the individual from obtaining the knowledge, skill, and abilities required to enroll in and graduate from a health professions school or a program providing education or training in an allied health profession, or who comes from a family with an annual income below a level based on low-income thresholds according to family size published by the U.S. Census Bureau. The institution you attend is responsible for determining if you meet the criteria.

Graduate PLUS Loans
Graduate PLUS loans are available through the federal government. The amount you are allowed to borrow is based upon the cost of attendance for your school less the other financial aid you have been awarded. You must maximize your annual Stafford loan borrowing limits before you can apply. Interest rates are higher than the other federal loan programs, and a credit check is required.

Institutional and Private Loans
Depending upon the school’s financial resources, loans with favorable terms and conditions may be available through your institution. Be sure to check with the FAO to see if they are available and how to apply.
SCHOLARSHIPS AND GRANTS

Scholarships are awards that do not need to be repaid. They may be granted based on criteria such as merit, financial need, or both, as well as your academic interests and group memberships.

State: Many states have scholarships for students who practice in underserved areas. Visit www.nhsc.hrsa.gov/communities to research opportunities. State dental associations may also have scholarships available.

The American Dental Association has a listing of dental associations, each of which may have information about scholarship opportunities in its state: www.ada.org/ada/organizations/searchcons1.asp.

Institution: Some dental schools offer scholarships, depending upon the school’s financial resources. These scholarships are often based on merit or financial need. You should check with the FAO for availability.

Federal: The Scholarship for Disadvantaged Students (SDS) is for students from a disadvantaged background as defined by the U.S. Department of Health and Human Services (HHS). See page 51 for definition. Funds are awarded to eligible dental schools by HHS. Schools are responsible for selecting recipients, making reasonable determinations of need and disadvantaged status, and making awards. You should contact the FAO for the availability of this award and any special application procedures.

Private: Finding outside scholarships requires research and initiative. Businesses, civic organizations, fraternities or sororities, associations, and other groups may have scholarship opportunities available. Some useful websites include www.fastweb.com and www.finaid.org. There are additional resources at the end of this chapter to help get you started, and don’t forget to also check with the FAO at your school for scholarship ideas.

Service Commitment: There are service commitment programs from the federal government available for students in the health professions. Acceptance into one of these programs requires that you commit to a period of service in exchange for the federal government covering the costs of your education.

- The National Health Service Corps Scholarship Program’s (NHSC) mission is to meet the health care needs of underserved communities. Only applicants who share the NHSC’s commitment and who agree to provide oral health services for two years in any underserved community identified by NHSC will be competitive for a scholarship. The NHSC scholarship pays tuition and fees, books, supplies, and equipment, and includes a monthly stipend. www.nhsc.bhpr.hrsa.gov

- The Armed Forces Health Professionals Scholarship Program (HPSP) offers scholarships to dental students that pay tuition, fees, books, instruments, and a stipend. To qualify, applicants must be U.S. citizens between the ages of 21 and 40 (although age limits can be waived in certain cases) and be enrolled in a dental school accredited by the Commission on Dental Accreditation (CODA). The service obligation is at least three years of active duty, depending upon the program under which the applicant receives his or her commission. www.goarmy.com/amedd/hjsp.jsp

- There is also a Financial Assistance Program (FAP) under the HPSP that provides extra payment and a monthly stipend for dentists in residency. Residents also receive Keeping Good Credit

It’s important to maintain good credit before, during, and after dental school. Your ability to obtain private loans and institutional loans may depend on your credit rating. (With the exception of the Graduate PLUS loan, your credit is not checked for federal loan programs.)

You can keep on top of your credit standing by reviewing your credit report. All U.S. consumers are eligible for one free credit report from each of the nationwide consumer credit reporting companies every year through www.AnnualCreditReport.com. Review the information carefully and report any errors promptly. The majority of credit bureau information is accurate, but you have the right to examine your file and to explain or correct the information it contains. The Consumer Credit Counseling Service, 866-889-9347, www.debtfreeforme.com, offers free or low-cost debt and credit counseling.
their current residency pay. After residency, dentists in the FAP agree to serve for a certain period of time. Once in the military, the pay is competitive and includes a signing bonus and fringe benefits. The sidebar How to Get the Government to Pay for Your Student Loans on page 56 has more information.

Work-Study: Some schools may have work-study opportunities for students with financial need. Students work for the dental school on or off campus through this program. Because of the rigorous academic demands of dental school, many institutions do not participate in this program, and those who do only make awards to students who request them. If you are interested in exploring this opportunity, contact your FAO.

International Students

Financial assistance for international students is limited. Federal aid is restricted to U.S. citizens and permanent residents. Private loan programs may be available, but almost all require a credit-worthy U.S. citizen or permanent resident to cosign. Eligibility may also be based on the type of visa you hold.

There are some options for international students researching financial aid possibilities.

Institutions: Dental schools may have scholarships or grants available for international students. You should check with the FAO at your institution for more information.

Private Scholarships: International students may be available for private scholarships based on merit or academic interest. The cultural departments of embassies or the Minister of Education’s office can be a good place to start researching opportunities.

Other Resources: Additional information on financial aid programs for international students is available at www.edupass.org/finaid. This website covers scholarships, loans, helpful organizations, and the financial aid application process.

HOW TO APPLY FOR FINANCIAL AID

Once you’ve determined how much money you need and what kind of financing options you are eligible for, you are ready to begin the application process. In addition to submitting the FAFSA to be considered for federal financial aid, some institutions require a separate financial aid application for that school.

FAFSA

To begin the process, fill out the Free Application for Federal Student Aid (FAFSA) accessible at www.fafsa.ed.gov. This form is used by dental schools to determine your eligibility for need-based aid. You should complete this form as soon as you can and by
January 1 of the year you plan to begin dental school. The website offers a worksheet and information on what documents you will need to have ready for filling out the form. Be sure to check the website for updates to deadlines and procedures.

- **Dental School Application for Financial Aid**

Around the time you submit the FAFSA, you should determine if you need to fill out any school-specific forms for financial aid. Each school has different application requirements, so be sure to contact the FAO for the most current forms and deadlines. It is very important to meet the school’s deadlines to be considered for the most favorable types of aid.

- **Forms You Will Need**

Around the time you submit the FAFSA, you should determine if you need to fill out any school-specific forms for financial aid. Each school has different application requirements, so be sure to contact the FAO for the most current forms and deadlines. It is very important to meet the school’s deadlines to be considered for the most favorable types of aid.

**Forms You Will Need**

For both federal and institutional financial aid applications, you will need to gather your income tax returns; if you are married, your spouse’s income tax returns; and possibly your parents’ income tax returns. You will want to prepare your tax return as early as possible to have this documentation ready for the application process. At some schools, in addition to the FAFSA application, you may be asked to submit a Need Access or CSS Profile (forms that collect additional information about your financial situation), and (for some need-based awards) your parents’ income tax returns.

</table>

This chart assumes a student in the 2009 entering class who will graduate in May or June 2013. The varying dates under “Date Repayment Begins” reflect the grace periods of the various loans.

**REPAYING STUDENT LOANS**

ADEA research has found that over 79% of dental school students graduate with debt of more than $100,000. Repayment of student loans is your responsibility. It is very important to keep your address and contact information up to date with the lender so you receive all correspondence regarding your loans. Not repaying and defaulting on your loan or making late payments can negatively affect your credit rating. Poor credit can affect your ability to borrow money to set up a dental practice, buy an existing practice, or finance a house or car.

There are several repayment plans available that will allow you to best match your financial situation after graduation. Depending upon the loan program, repayment will begin after graduation or a grace period, when you drop below full-time or half-time enrollment, or when you leave school.

Table 4-3 provides a sample log of a first-year student’s outstanding debt, including any debt from undergraduate education.

**REPAYMENT: CONDITIONS AND REQUIREMENTS, PLANS, AND OPTIONS**

The financial aid officer at your school will conduct an exit interview upon graduation. The purpose of the interview is to make sure you understand the repayment terms of your loans and provide information on sample payment plans and options. This section provides an overview of the repayment process.

**Conditions and Requirements:** The conditions and requirements of a loan are the interest rate, the length of time you have to repay the loan, and when repayment begins. This information will be given to you before you accept the loan. Repayment can begin immediately after you graduate or after a grace period that can last six, nine, or 12 months. Loan repayment schedules
What are you doing right now?
We go straight through the summer at Marquette between the second and third year. We’re immersed in clinic full time, and I mostly spend my time doing restorative procedures. I’m working on my first crown prep and denture case. During the day I usually get to see one patient in the morning and one in the afternoon. This year I’m also serving on the ADEA Council of Students, Residents, and Fellows as a representative for my school, one of the Regional Representatives, and the Marquette American Student Dental Association (ASDA) Licensure Representative.

What are your short-term and long-term goals?
I have a health professions scholarship through the Air Force. My mother, who is an officer in the Air Force, told me about the opportunity. I was interested in the program so I got a hold of a recruiter and talked to him at the same time I was applying to dental school. I paid for the first year of dental school, and the Air Force is paying for the final three years in exchange for service. The scholarship covers all school related expenses and provides a stipend each month. After graduation I will be an Air Force dentist for three years. As of now my only job with the Air Force is attending and finishing school. It’s really a great deal because I won’t feel the burden of tons of loans after I graduate.

Advice to applicants and first-year students?
I would say the biggest thing is to apply early. Schools see a lot of applications. You could be the best applicant in the world but if they don’t see it... Work on being a well-rounded individual. Think about what you can bring to the program as an individual whether it’s been leadership activities or volunteer work. Make sure you have experiences in other areas.

For first-year students, try to come up with your study schedule as early as you can. You need to start out being organized and planning out your days and figuring out what you need to do immediately. You can’t go about studying the same way you did in undergrad. In undergrad always used note cards to study, but in dental school I had to change my study methods because there just weren’t enough hours in the day to get everything done. Learn to develop great time management skills and balance your days.

What do you view as the most interesting issue in dentistry?
One of the coolest things in this profession is the changing technology. At Marquette we constantly have lunch and learn sessions describing this new aspect of dentistry. For instance there’s a machine called the Cerec that actually can make a crown in the office. It not only eliminates the lab fabrication of the crown, but it also allows the patient to receive a crown in one sitting.

What do you do for balance in your life?
The first year I made it a point to set aside time for myself away from school. If I did that I found I actually did better in all of my classes because I was less stressed out. At minimum I scheduled some sort of physical activity, like running, every other day. If it was a hectic week, I made sure on the weekend I did something for myself like go to dinner or a movie with friends. It’s a nice balance to have activities away from dental school.

What is the last good book you read?
Jemima J. by Jane Green. It’s a typical chick book and a nice change from thinking about science or dentistry all day. Each night I usually read a chapter or so before going to bed.

Are you married/partnered/single? Any children?
I’m not married but in a relationship. My boyfriend is also in the dental profession as an orthodontist in Dallas, Texas.

Table 4-4 provides sample repayment plans.
How to get the government to pay your student loans

With college costs rising at twice the rate of inflation, many students start their dental careers with thousands of dollars in student loan debt. Participating in federal- and state-sponsored loan repayment programs is a way to significantly reduce your debt burden. The amount you may be eligible for depends on a number of factors—the agency you work for, the length of time you work there, and the types of loans you have are the most important.

Although the rules can be complicated and every program has different requirements, there is a wealth of information available about those programs for people who are willing to look. To make the process a little easier to understand, this sidebar describes the types of programs that are available and how much you may be able to save by participating.

Federal Loan Repayment Programs Specific to Health Professionals

Dental graduates may be eligible for the following programs:

- Faculty Loan Repayment Program
  www.bhpr.hrsa.gov/DSA/flrp/index.htm
  Who’s eligible: new faculty from disadvantaged backgrounds at qualified health education institutions.
  Time and money: a maximum of $20,000 for two years of teaching at qualified health institutions, plus matching funds from the host institution.

- National Health Service Corps Loan Repayment Program
  www.nhsc.hrsa.gov/loanrepayment
  Who’s eligible: dentists, allopathic and osteopathic physicians, certified nurse-midwives, certified family nurse practitioners, and physician assistants.
  Time and money: up to $50,000, tax free, in exchange for two years of service with the possibility of applying for additional support for extended service.

- National Institutes of Health Loan Repayment Programs
  http://lrp.info.nih.gov/about/faqs_loanpayments.htm
  Who’s eligible: students with doctoral degrees from accredited institutions who are interested in research.
  Time and money: up to $35,000 per year for a two-year contract.

- Indian Health Service Loan Repayment Program
  www.loanrepayment.ihs.gov
  Who’s eligible: students in all health professions, with special consideration given to physicians, nurses, and medical specialists in high-need fields.
  How much: up to $20,000 a year for two year and, in some cases, an additional 20% to offset the tax liability of award.

- National Institutes of Health Loan Repayment Programs
  http://lrp.info.nih.gov/about/faqs_loanpayments.htm
  Who’s eligible: students in all health professions, with special consideration given to physicians, nurses, and medical specialists in high-need fields.
  How much: up to $20,000 a year for two years and, in some cases, an additional 20% to offset the tax liability of award.

- Federal Student Loan Repayment Program
  www.opm.gov/oca/pay/studentloan
  Dental students may also be eligible for the Federal Student Loan Repayment Program. This program allows individual federal agencies to establish loan repayment programs at their discretion as an incentive to recruit and retain highly trained employees. If you are employed at a qualified federal agency, you may be eligible for repayment of up to $10,000 of federal student loan debt per calendar year, with a cumulative maximum of $60,000; in return, you agree to work for the agency for at least three years.

U.S. Military Programs

- U.S. Navy Health Care
  www.navy.com/healthcareopportunities

- U.S. Army Health Care
  www.goarmy.com/amedd/

- U.S. Air Force Health Care
  www.airforce.com/opportunities/healthcare

Branches of the U.S. military have programs for dentists, doctors, nurses, and medical technicians that include sign-on bonuses, up to 100% tuition payment, and stipends while in school. In exchange, you agree

Options: After graduation, there are additional options available to help you develop a repayment plan that fits your income level and career path.

- Loan Consolidation: If you have multiple loans at different interest rates, consolidating your loans can help streamline the payments and may reduce your monthly payments. Loan consolidation gives you one loan payment with a single interest rate. Private lenders can assist you with loan consolidations. You should examine all of the terms closely to make sure this option is better than not consolidating.

- Deferment: If you pursue additional graduate education, deferring your federal student loans is also an option. Interest does not accrue on subsidized loans during deferment. Dental students who enroll in residency programs at accredited U.S. dental schools are eligible for in-school deferment for the duration of their residency if the program is
to serve in the military for as many years as you receive program benefits.

**Hospitals and Private Health Care Facilities**

Many hospitals and private health care facilities use loan forgiveness to recruit health care professionals. If you’re considering working for such an institution, check to see what loan repayment assistance it may offer.

**State Funding**

Check with your state health planning office—some states have scholarship and loan forgiveness programs targeted toward placing small numbers of primary care professionals in underserved areas. Opportunities can be found at www.nhsc.hrsa.gov/communities.

**Things to Consider**

If any of these loan repayment programs interest you, there are a few things you’ll want to consider as you proceed:

- **Tax implications** – Any money that you receive from a loan repayment is considered taxable income. Lump-sum loan repayments can be helpful because they generally lower the amount of interest you pay over the life of your loan, but they can also result in a higher tax burden. Gradual loan repayments may lessen your tax burden, but you may end up paying more in interest. If given the choice between lump-sum and gradual loan repayments, take a close look at your personal financial situation to decide what’s best for you. Some programs will also cover the cost of your taxes, so make sure to ask about this too.

- **Application dates** – Some programs require that you sign up before you finish school. For this reason, it’s a good idea to consider these programs early.

- **Service contracts** – Loan repayment in the majority of these programs is contingent on a specified length of service as outlined by your service contract; breach of this contract is serious business and can result in heavy financial penalties (not to mention loss of repayment funds)! Make sure you don’t have other commitments on the horizon that will prevent you from completing your term of service.

- **Eligibility requirements** – It sounds simple, but make sure you are eligible for the loan repayment programs to which you are applying. As an example, some of these programs require that you come from a disadvantaged background (as certified by your educational institution) to be eligible. In this instance, it truly pays to read the fine print up front – if you focus your efforts on something you’re not eligible for, you may miss out on other opportunities.

- **False assumptions** – Some students may be turned off by loan repayment programs because they’re afraid they will lose control over where they will live and work in the few years after graduation. This is true in some, but not all, cases. Don’t let assumptions about a program prevent you from participating. Do your homework and find out what each program will require of you – they’re all different.

- **Future goals** – Want to buy a house? Help younger brothers and sisters pay for their higher education? Open your own practice? Enter academia? Be a leader in community service? The faster you can decrease your debt load, the faster you can focus on your other dreams. Loan repayment programs are a great way to make this happen!

For more information about loan repayment programs, contact your institution’s FAO. They may be able to help you navigate the many loan repayment programs mentioned, as well as clue you in to institution-specific programs.

ADEA Opportunities for Minority Students in U.S. Dental Schools, published by ADEA, includes practical information of special interest to minority students considering careers in dentistry. This publication explains the scope of career opportunities available to minorities in dentistry, dental school admissions requirements, financing a dental education, deciding where to apply, and school-specific information directed to minority applicants. Available from ADEA Publications Department, 1400 K Street, NW, Suite 1100, Washington, DC 20005; 202-289-7201; publications@adea.org.

ADEA also has numerous scholarships and awards for students during dental school. Visit www.adea.org to learn more about these opportunities.

Fastweb.com is a searchable database of scholarships, awards, and other resources to assist students from all disciplines.

Finaid.org is a searchable database that also includes helpful information about the financial aid process. Students can register and receive updates according to their profile and interests.

- Credit, Debt Management, and Financing

AnnualCreditReport.com allows you one free credit report a year from all three major credit reporting agencies.

Debtfreeforme.com offers low cost and free credit counseling.

Edupass.org is a comprehensive guide for international students pursuing an education in the United States.

Myfico.com provides useful information on credit scores, obtaining your credit score, and debt management.

Studentaid.ed.gov is the government’s site on federal financial aid and offers useful information on loans, repayment options, and the application procedure.

- Updates and Advocacy

The Student Aid Alliance is a website that provides up-to-date information on federal aid programs and opportunities for students to let their voices be heard on Capitol Hill regarding funding for student aid. Visit www.studentaidalliance.org.

Tax Credits and Deductions

There are tax credits and deductions you can take advantage of as a student and a holder of federal loans that can help you manage your debt during and after dental school.

The Lifetime Learning Credit: This is a tax credit for qualifying educational expenses. You may claim up to $2,000 on each tax return, up to a cumulative total of $10,000.

Tuition and Fees Deduction: You may be able to reduce your taxable income up to $4,000 for tuition and fees paid toward your education.

Student Loan Interest Deduction: The Student Loan Interest Deduction is available for the first $2,500 of interest paid on your federal student loans. It does not require that you itemize deductions on your tax return.

For more information, read IRS Publication 970: Tax Benefits for Education. www.irs.gov/publications/p970/index.html
