

DENTAL EDUCATION IN THE UNITED STATES AND CANADA

A REPORT TO THE CARNEGIE FOUNDATION
FOR THE ADVANCEMENT OF TEACHING

By
WILLIAM J. GIES

WITH A PREFACE BY HENRY S. PRITCHETT
PRESIDENT OF THE FOUNDATION

BULLETIN NUMBER NINETEEN

NEW YORK
THE CARNEGIE FOUNDATION
FOR THE ADVANCEMENT OF TEACHING
522 FIFTH AVENUE

1926

CONTENTS

PREFACE	xiii
INTRODUCTION	3
A. Dentistry a highly mechanical division of the healing art	3
B. Dentistry an independent and closely organized profession	3
C. Dentistry not an accredited specialty of the practice of medicine	5
D. Dentistry properly a form of health service to be made equivalent to an oral specialty of the practice of medicine	9
E. Primary educational needs of dentistry as an equivalent of an oral specialty of the practice of medicine	14
PART I. GENERAL HISTORY OF DENTISTRY	
I. GENERAL HISTORY OF THE PRACTICE OF DENTISTRY	23
A. Outline of its evolution	23
B. Emergence from prehistoric customs	24
C. Main developments before the rise of dentistry in America	25
<i>a.</i> Growth among ancient peoples	25
<i>b.</i> Status during the Middle Ages	26
<i>c.</i> Progress in modern Europe	26
D. Advancement in the United States before the establishment of the first dental school in 1840	28
<i>a.</i> Colonial era	28
<i>b.</i> Early period of American independence	29
E. Organization and promotion in the United States since 1840	31
<i>a.</i> Inauguration of the era of coöperation among dentists	31
<i>b.</i> Organizations of practitioners of dentistry	32
<i>c.</i> Educational agencies for the betterment of dental practice	34
<i>d.</i> Organizations for the public regulation of the practice of dentistry	34
<i>e.</i> Dental journals	35
<i>f.</i> Improvements in dental practice	36
1. General inhalation anesthesia, as a surgical procedure, a gift from dentistry	36
2. Exceptional advancements	36
F. General conditions in Canada	37
II. GENERAL HISTORY OF DENTAL EDUCATION IN THE UNITED STATES	38
A. Educational status of the practice of dentistry shortly before the establishment of the first dental school in 1840	38
<i>a.</i> Types of practitioners and the nature of their preliminary training	38
<i>b.</i> Unsuccessful efforts to develop dental education under medical auspices	38

c. Dental education, disdained by medicine, created an independent system	39
B. Progress in dental education from the organization of the first dental school, in 1840, to the beginning of the period of public regulation of dental practice in 1868	40
a. First dental school	40
b. Early growth of dental schools	41
c. First dental school in a university and associated with a medical school	41
d. Statistical data regarding the dental schools in existence when public regulation of dental practice was begun in 1868	43
e. Influences that terminated the apprenticeship system of dental training, and initiated public regulation of the practice of dentistry	43
C. Period between 1868 and the establishment of the first association of dental schools in 1884	45
D. Development of dental education, since 1884, under the guidance of organizations established for its promotion	47
a. Rise and fall of commercialism in dental education	47
b. Cumulative general influence of the special associations for the advancement of dental education	50
1. Organizations which, with the Canadian Dental Faculties Association, were amalgamated in 1923 as the American Association of Dental Schools	50
(a) National Association of Dental Faculties	50
(b) Dental Faculties Association of American Universities	51
(c) American Institute of Dental Teachers	51
2. American Association of Dental Schools	52
3. Dental Educational Council of America	53
E. Evolution of general requirements in dental education	55

PART II. PRESENT MAIN FEATURES OF DENTAL EDUCATION IN THE UNITED STATES

Section A. Conditions of the practice of dentistry that determine its educational requirements

III. STATUTORY DEFINITION AND REGULATION OF THE PRACTICE OF DENTISTRY	59
A. Legal status of the practice of dentistry	59
a. Basis for its public control	59
b. Definition and restrictions of dental practice	59
c. Dentistry as delimited by decisions of the courts	60
1. Acts that constitute the practice of dentistry	60
2. Dentistry and medicine not sharply differentiated in the scope of their legal practice	61
3. A dentist is not a physician	62

CONTENTS

v

B. Enforcement of the dental practice acts	63
a. Determination of the qualifications of prospective practitioners	63
1. By direct examination	63
2. By interstate certification ("reciprocity")	64
b. State boards of dental examiners	65
1. Function, membership, appointment, and terms of service	65
2. Desirability of improvement in the license examinations	66
3. Need for the highest type of ability, integrity, and disinterestedness in the membership of the boards of dental examiners	67
c. Educational import of the licensing function of the examining boards	68
C. Important opportunities open to the National Association of Dental Examiners to effect improvements	69
a. Significant status of the Association	69
b. Desirability of improvement and uniformity in the dental statutes	69
c. Need for uniform national examinations as a basis for suitable interstate exchange of licenses	70
 IV. TYPES, NUMBER, AND DISTRIBUTION OF DENTAL PRACTITIONERS	 71
A. Types of dental practitioners	71
a. Dentists or dental surgeons	71
1. General practitioners	71
2. Specialists	71
3. Circumstances affecting selection and award of the two current professional degrees in dentistry	72
b. Dental or oral hygienists	73
1. Legal status	73
2. Origin and evolution of the practice of dental hygiene as an auxiliary of the practice of dentistry	73
(a) Preliminary suggestions	73
(b) Early events in Connecticut	74
(1) Evolution of the practice of dental hygiene	74
(2) First training school for dental hygienists	74
(3) Oral health-service for school children at Bridgeport, Conn.	75
(4) Original dental-hygiene practice act	76
(c) First university courses for dental hygienists	76
(d) First schools for dental hygienists in dental infirmaries	77
(e) Extension of the auxiliary practice of dental hygiene	77
B. Dental technicians	79
C. Number of dental practitioners	83
D. Distribution of dental practitioners	84
E. Effects of higher educational requirements on the number and distribution of dental practitioners	86

V. DEFICIENCY OF DENTAL SERVICE FOR THE NEGRO GROUP	88
A. Danger to a community from indifference to the health of any portion of the population	88
a. Consequences of prevailing general disregard for health of the Negro	88
b. Importance of oral health-service for the colored group	88
B. Number, distribution, and organization of Negro dentists in the United States	89
a. Number and distribution	89
b. Organization	90
C. Extended health-service education for the Negro group an urgent national problem	91
a. General serviceability of the colored practitioner among his own people	91
b. Urgent need for a larger number, and more effective distribution, of well-trained colored practitioners of health service	91
c. Inadequacy of the present rate of production of Negro dentists	92
D. Urgency of more generous support of dental schools for colored students	92
a. Dental schools of Howard University and Meharry Medical College	92
b. Need for additional dental schools for Negroes	93
E. General considerations	93

PART II (CONTINUED)

Section B. Work of the dental schools

VI. REGULATION OF DENTAL SCHOOLS BY STATE LAWS AND BY PROFESSIONAL ORGANIZATIONS	97
A. Agencies and general consequences of external control of dental schools	97
B. Regulation by statutory provision of minimum requirements for dental schools	98
a. Control of schools through the explicit prerequisite of reputability	98
1. General specifications affecting reputability	98
2. Authority of a state board to refuse admission of graduates of unworthy schools to license examinations	98
(a) A judicial function	98
(b) Power to determine the reputability of a school may not be delegated	99
(c) Admissibility of evidence as to the record made by graduates of a school in the license examinations	99
3. Provision of reputability no longer an adequate minimum requirement	100
b. Control of schools through requirements affecting the scope and conditions of their instruction of students	100
C. Advisory control by professional organizations	101

CONTENTS

vii

a. General organizations of practitioners	101
b. Special educational organizations	101
1. American Association of Dental Schools	101
2. Dental Educational Council of America	102
(a) Period before the first public classification of dental schools (1909-18)	102
(1) Conditions preceding the announcement, in 1916, of the original minimum requirements for a Class A rating	102
(2) Original minimum requirements for a Class A rating (1916)	104
(3) Opposition from the Dental Faculties Association of American Universities	104
(b) First public classification of dental schools (1918)	106
(c) Classifications of dental schools since 1918	106
(d) Special features of the Council's rating procedure	108
(1) "Point" system of rating schools	108
(2) Lack of value, for rating purposes, of the percentages of a school's graduates who fail to pass license examinations	109
(3) Publication of classification standards	110
(e) Suggested improvements in the status and work of the Council	111
(1) Prospective betterment of its relationships	111
(2) Proposed reorganization and enlargement of its responsibilities	113
VII. CURRICULUM AND TEACHING OF DENTISTRY	115
A. Outline of the development of the curriculum	115
a. Early influences	115
b. Important model curricula since 1884	117
c. Dental and medical curricula for 1925-26 contrasted	122
B. Requirements in pre-professional education	122
a. Influence of the National Association of Dental Faculties in raising the requirement to graduation from a high school	122
b. Influence of the Dental Faculties Association of American Universities in raising the requirement to a year of work in an academic college	124
c. Comparison with pre-medical requirements	125
C. Present conditions affecting the dental curriculum	128
a. Mechanical aspects	128
b. Esthetic phases	131
c. Medical relationships	133
1. Medical sciences	133
2. Clinical medicine	136
d. Clinical dentistry	137

<i>e.</i> Graduate work	138
<i>f.</i> Special curricula and courses	140
D. General quality of the teaching of dentistry and the status of the teachers	141
VIII. EQUIPMENT AND FINANCIAL SUPPORT OF DENTAL SCHOOLS	143
A. Equipment	143
<i>a.</i> Early conditions	143
<i>b.</i> Recent developments	145
<i>c.</i> Undesirable relationships of supply houses	147
B. Financial support	148
<i>a.</i> Proprietary era	148
<i>b.</i> Recent conditions	149
<i>c.</i> Need for endowments	152
IX. RESEARCH	154
A. General import for dentistry	154
B. Research at dental schools and medical schools contrasted	155
C. Special conditions that interfere with research in dental schools	156
D. General progress in dental research	157
<i>a.</i> Success in reparation	157
<i>b.</i> Failure in prevention	158
<i>c.</i> Special agencies for the promotion of dental research	158
1. Journal and association	158
2. Scientific Foundation and Research Commission of the American Dental Association	159
(<i>a.</i>) Establishment and achievements	159
(<i>b.</i>) Weaknesses of the Commission in conception and purposes	161
(<i>c.</i>) Suggested change of plan	162
E. Some urgent problems for investigation in dental schools	164
<i>a.</i> Need for sustained interest in procedures of treatment	164
<i>b.</i> Essential biological considerations	165
<i>c.</i> Various influences on the processes of normal dentition	167
<i>d.</i> Destructive factors in the oral environment	168
1. Enamel	168
2. Periodontal tissues	170
<i>e.</i> Illustrations of desirable research in two fields outlined in subsections <i>c</i> and <i>d</i> preceding	172
1. The types of dental and oral abnormalities that are directly influenced by heredity	173
2. The exact elementary composition and the mineralogical constitution of the inorganic matter in enamel, with particular reference to variations in the resistance to chemical change	174

F. Paramount requirements for the promotion of research in dental schools	175
---	-----

PART III. PROSPECTIVE IMPROVEMENTS OF DENTAL EDUCATION IN THE UNITED STATES

X. PROPOSED GENERAL REORGANIZATION	179
A. Basis of the suggested reconstruction	179
B. Need for earnest attention to dental education in the universities	179
C. Requirements for the improvement of teaching and research, and for the elevation of the status of the dental teacher	180
D. Equalization of pre-dental education with pre-medical education	181
a. General advantages of at least two years of study in an academic college	181
b. Conditions in an academic college that favor orientation of the student	184
c. Desirability of general tests of vocational adaptability during the period of pre-professional education	185
d. Special advantages for dental education	186
e. Academic subjects transferable from the dental to the academic curriculum	187
E. Three-year undergraduate curriculum for the training of general practitioners only	187
a. Basis of the proposed reduction in the length of the present undergraduate curriculum	187
b. Importance of a basic undergraduate curriculum for the training of general practitioners only, and the reservation of specialties for graduate curricula	190
c. Betterment of the teaching of the undergraduate courses	192
1. Mechanical phases	192
2. Esthetic features	192
3. Medical sciences	193
4. Clinical work	196
d. Feasibility of the proposed reduction in the length of the undergraduate professional curriculum from four years to three	196
1. Sanctioned by a permissive rule of the Dental Educational Council	196
2. Experience with students admitted from the academic college to advanced standing	197
(a) General	197
(b) Observations at Marquette	197
(c) Approbative decisions of state boards of dental examiners	199
3. Important saving of time in the teaching of dental technology at Michigan	199

CONTENTS

F. Various types of combined undergraduate curricula	200
G. Graduate work for all types of oral specialization	201
H. General aspects of the "two-three-graduate plan"	202
<i>a.</i> Academic and professional degrees	202
<i>b.</i> Summary of advantages	203
<i>c.</i> Discussion of suggested disadvantages	205

PART IV. DENTAL EDUCATION IN CANADA

XI. DENTAL EDUCATION IN CANADA	209
A. Introduction	209
B. General status of dental practice	211
<i>a.</i> Before the creation of the Dominion	211
<i>b.</i> Since the confederation of the provinces	211
1. Statutory regulation	211
2. Organizations of practitioners	212
C. Progress of dental education	213
<i>a.</i> Conditions before the establishment of the first permanent Canadian dental school in the Province of Ontario	213
<i>b.</i> First Canadian dental school	214
<i>c.</i> Succeeding Canadian dental schools	215
1. Province of Quebec	215
2. Province of Nova Scotia	216
3. Province of Alberta	216
<i>d.</i> Number of graduates of Canadian dental schools	217
<i>e.</i> Organizations for the promotion of dental education	217
<i>f.</i> Educational merits of the Canadian dental schools	218
<i>g.</i> Equipment and financial needs	219
D. Import of present dental relationships between Canada and America	221

PART V. GENERAL VIEWS AND CONCLUSIONS

XII. GENERAL VIEWS AND CONCLUSIONS	225
A. Vital relationships of the teeth	225
B. Prevalence of dental and oral disorders	226
C. Important deficiencies of oral health-service	227
<i>a.</i> Uncertainty regarding adequate treatment of dental infections	227
<i>b.</i> Failure in prevention of dental disorders	232
D. Main requirements for the improvement of oral health-service	234
<i>a.</i> Practice	234
<i>b.</i> Education	237
<i>c.</i> Research	238
