Obtain Your DENTPIN® Today!

**DENTPIN® (DENTal Personal Identifier Number)**, a unique personal identifier for applicants and students involved with the U.S. dental education system and standardized testing programs, is replacing Social Security Numbers, Canadian Social Insurance Numbers, or Reference Numbers to help protect sensitive, identifying information while facilitating data collection and reporting.

The DENTPIN system is a simple, user-friendly process with a single, self-service, Internet-based access point for students and test-takers to obtain and retrieve a personal identifier that is used for:

- applications for testing (e.g., Dental Admission Test, National Board Dental Examinations, National Board Dental Hygiene Examination)
- admission to advanced education programs (ADEA Postdoctoral Application Support Service)
- dental school admissions (including the American Dental Education Association Associated American Dental School Application Service and the Texas Medical and Dental School Application Service)
- admission to supplemental education programs for international dental graduates (ADEA Centralized Application for Advanced Placement for International Dentists)

Access your DENTPIN at [www.ada.org/goto/dentpin](http://www.ada.org/goto/dentpin).
